

Yash Mathur

Software Developer Intern — Full-Stack Developer

Jaipur, India | +91 8824141454 | yashmathur1425@gmail.com

LinkedIn | GitHub | Codolio

Summary

Computer Science undergraduate focused on software development, data structures, object-oriented programming, database systems, REST API development, and full-stack web applications. Built 3+ deployed applications serving 300+ users, processed 5,000+ operational records, improved workflow efficiency by up to 40%, and managed 20+ GitHub-based code updates. Skilled in C++, Python, JavaScript, React.js, Node.js, SQL, DBMS, REST APIs, Git, GitHub, Docker, CI/CD, Linux, and Vercel.

Technical Skills

Languages: C++, Python, JavaScript, SQL

Core CS: Data Structures, Arrays, Strings, OOPs, Problem Solving, Time Complexity

Frontend: React.js, Next.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, API Integration, Backend Logic

Databases: DBMS, SQL, Supabase, Relational Database Design

AI/Automation: OpenAI API, Prompt Engineering, LLM Workflows, Automation Pipelines

Tools: Git, GitHub, VS Code, Vercel, Docker, CI/CD, Linux

Experience

Co-Founder & Software Developer — Pramana15

Jan 2025 – Present

- Architected 3+ deployed web applications supporting 300+ active users across business operations and automation systems.
- Implemented 5+ REST API integrations and database operations using Node.js, Supabase, and JavaScript.
- Automated lead processing with OpenAI API, reducing repetitive manual tasks by 35%.
- Optimized backend data handling and SQL-based storage flows, increasing lead conversion efficiency by 25–35%.
- Managed 20+ GitHub code updates across frontend components, backend APIs, database tables, and deployments.

Web Developer Intern — OSHVIK

Aug 2025 – Present

- Designed 10+ responsive React.js screens using reusable components and mobile-first layouts.
- Resolved 15+ frontend layout issues across desktop and mobile pages, improving cross-device usability.
- Improved page responsiveness across 8+ application views using React.js, CSS3, and reusable UI sections.

Web Developer & AI/ML Intern — Tata Power

Jun 2025 – Aug 2025

- Created a transformer fault identification system covering 10+ utility fault scenarios.
- Processed 5,000+ operational records for validation, analysis, and transformer fault-impact mapping.
- Implemented backend mapping logic to identify affected consumer zones during transformer failures.
- Reduced record-checking effort by 30% while improving validation accuracy across utility data operations.

Projects

Blockchain-based MRV System

Live

- Engineered a blockchain-enabled MRV system with 4 modules for monitoring, reporting, verification, and traceability.
- Increased reporting accuracy by 40% using validation rules, audit-ready records, and integrity checks.
- Delivered 3+ full-stack modules for record tracking, verification status, and stakeholder reporting.

AI Chatbot & Automation System

Live

- Engineered an AI chatbot using OpenAI API and backend routing logic to automate 100+ user interactions.
- Integrated 3+ REST API flows for lead capture, response generation, and database routing.
- Decreased manual response handling by 35% using automated decision logic and API-based processing.

AI Content Automation Platform – ShortsOS

Live

- Created a full-stack content automation platform supporting 5+ short-form content generation flows.
- Accelerated content operations by 40% using backend API orchestration and reusable content templates.
- Shipped 5+ full-stack features using JavaScript, REST APIs, GitHub, and Vercel deployment.

Education

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

SGPA: 8.70/10

Coursework: Data Structures, Object-Oriented Programming, DBMS, SQL, Machine Learning

Certifications

- NPTEL: Object Oriented System Development Using UML, Java and Patterns – Elite Rank Holder
- UdemY: The Complete Full-Stack Web Development Bootcamp
- UdemY: Decoding DevOps – From Basics to Advanced Projects with AI
